Dear Students

DEPARTMENT OF MANAGEMENT & PROJECT MANAGEMENT: IMPLEMENTATION OF POSTGRADUATE DIPLOMAS FOR 2021

You are aware by now that the revised Higher Education Qualifications Sub-Framework (HEQSF) necessitated amendments to qualification offerings on a national level. The HEQSF is a 10-Level Framework, which includes an additional qualification, i.e. the Level 8 Postgraduate Diploma that serves as the minimum admission requirement to the Level 9 Master's qualification.

The Cape Peninsula University of Technology has been at the forefront of curriculum revision and curriculum development having completed the revised Diplomas, the new Advanced Diplomas and the Postgraduate Diplomas (PGDip). Each qualification needs to follow due process for approval, accreditation and registration before the qualification may be offered by any institution.

The PGDip in Business Process Management and the PGDip in Project Management has been approved, but is currently in the process of being evaluated for accreditation before registration with the South African Qualifications Authority (SAQA). The timelines for the completion of these processes fall outside the control of CPUT and as such, no confirmation as to when these PGDip's will be ready for implementation may be given at this stage.

Students will be informed accordingly via the website and other platforms, should the PGDip in Business Process Management and/or the PGDip in Project Management be offered in 2021.

Yours sincerely

A handwritten signature in blue ink, appearing to read "ABuys".

Ms A F Buys
Head of Department (Acting)
Department of Management & Project Management
